

# INDEX

S. No.	Program	Page No.	Sign
1.	Write a program to create a linear array named la of size 6, and perform traversing operation on it using function name "traverse".	1	
2.	Write a program to insert an element from a linear array using function name "insert".	2	
3.	Write a program to delete an element from a linear array using function name "delete".	4	
4.	Write a program to create a single node in linked list.	6	
5.	Write a program to create linked list at compile time having 4 node.	7	
6.	Write a program to create linked list having 4 node at runtime.	9	
7.	Write a program to perform traversing in linked list using function named "traverse".	11	
8.	Write a program to insert a node at the beginning of the linked list.	13	
9.	Write a program to insert a node at the end of the linked list.	16	
10.	Write a program to insert a node at the specific position of the linked list.	19	
11.	Write a program to delete a node at the beginning of the linked list.	23	
12.	Write a program to delete a node at the end of the linked list.	26	
13.	Write a program to delete a node at the specific position of the linked list.	29	
14.	Write a program to create a grounded header linked list.	32	
15.	Write a program to create a circular linked list.	35	
16.	Write a program to perform push operation in stack using array at compile time.	38	
17.	Write a program to perform pop operation in stack using array at compile time.	40	
18.	write a program to implement stack operation in array using switch case.	42	
19.	Write a program to perform push operation in stack using linked list.	45	
20.	Write a program to perform pop operation in stack using linked list.	49	
21.	Write a program to find factorial of a given number using recursion.	52	
22.	Write a program to find Fibonacci series using recursion.	53	
23.	Write a program to implement "Towers of Hanoi" problem using recursion.	54	
24.	Write a program to insert an element into a queue using array.	55	
25.	Write a program to delete an element from a queue using array.	59	
26.	Write a program to implement binary tree and perform preorder traversal using recursion/stack.	62	
27.	Write a program to implement binary tree and perform in-order traversal using recursion/stack.	64	
28.	Write a program to implement binary tree and perform post-order traversal using recursion/stack.	66	
29.	Write a program to implement linear search algorithm.	68	
30.	Write a program to implement binary search algorithm.	70	
31.	Write a program to implement bubble sort.	72	
32.	Write a program to implement insertion sort.	74	
33.	Write a program to implement selection sort.	76	
34.	Write a program to implement merge sort.	78	
35.	Write a program to implement quick sort.	81
